

NextGen base™

MULTIPURPOSE STAND ALONE HVAC EQUIPMENT CONTROLLER

NextGen base™

- An alternative to the CenCon® Controller when BacNet or Modbus communication is not required

Features

- Controls fans, dampers, heating, staged cooling and humidification
- Built on the same tried-and-true logic as the Engineered Air Trac controllers
- Full featured web browser based status display and adjustment via an Ethernet port
- Status lights on the face of the controller
